[PORTFOLIO](#) | [GITHUB](#) | [LINKEDIN](#)

WEB DEVELOPER

Web Developer skilled in both front-end and back-end technologies, with a strong foundation in **JavaScript, React.js, and Node.js**. Proficient in building responsive, dynamic web applications and integrating real-time data using APIs and databases like **MongoDB, MySQL and Firebase**. Dedicated to writing clean, efficient code and delivering high-quality, user-friendly interfaces.

EDUCATION

Sinhgad Institute of Technology and Science

Narhe , Pune

Bachelor Of Engineering

Aug. 2022 – May 2026

PROJECTS

GRAINLOG | React.js, HTML, Tailwind CSS, JavaScript, CSV Data, Git

[LINK](#)

- Developed a **real-time dashboard** to monitor grain storage conditions dynamically.
- Integrated **live sensor data** from CSV files to track **temperature, humidity, and CO₂ levels**.
- Implemented **color-coded visual indicators** to highlight **safe, warning, and danger** zones.
- Created modular and reusable React components for maintainable and scalable UI.

CRYPTO MARKETPLACE | React.js, HTML, Tailwind CSS, JavaScript, API, Git

[LINK](#)

- Developed a **real-time cryptocurrency tracking app** using **React**.
- Integrated a **cryptocurrency API** to fetch and display live market data.
- Implemented **Google React Charts** to visualize price trends.
- Delivered a high-performance application with responsive design and seamless real-time updates, enhancing user engagement and satisfaction. Enabled detailed coin insights when users click on a specific cryptocurrency.

STUDENT MANAGEMENT DASHBOARD | Firebase, ReactJS, Material UI, API, Git

[LINK](#)

- Implemented authentication using **Firebase**, allowing only **admin** to sign in.
- Built a **real-time Firestore database** for adding and managing student records.
- Designed UI with **Material Kit UI**, ensuring a modern and responsive layout.
- Added a **secure logout** feature preventing access without reauthentication.

NOTES SAVER | React.js, JavaScript, HTML, Tailwind CSS, Redux, Git

[LINK](#)

- Developed a feature-rich note app with create, edit, delete, and copy functionalities.
- Implemented **Redux** for centralized state management and scalability.
- Ensured persistent storage with LocalStorage integration.
- Ensured a **mobile-friendly and responsive design** for accessibility across devices.

SKILLS

Languages: JavaScript , TypeScript, C++, HTML/CSS, Python

Frameworks: React.js , Node.js, Express.js

Libraries: Tailwind, React Router, Redux

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, Postman, Firebase, Visual Studio

ACHIEVEMENTS

- Solved 500+ problems across coding platforms like [CODECHEF](#) and [LEETCODE](#)
- Certificate for completing all the lessons and practice projects in Learn Python - [CERTIFICATE](#)
